**FUND MANAGER'S REPORT**

The Bangko Sentral ng Pilipinas delivered another 25 basis points interest rate cut in the latest September Monetary Board meeting, bringing the overnight reverse repurchase facility to 4.0%. Accordingly, the rates on the overnight deposit and lending facilities were also reduced to 3.50% and 4.50%, respectively. The decision was based on the assessment that price pressures have moderated further since the last meeting. Furthermore, the local central bank's latest baseline forecasts continue to indicate inflation likely to settle within the lower portion of the 2.0 – 4.0% target for 2019 up to 2021. With the September inflation print falling to 0.9%, from the previous month's 1.7%, year to date inflation has already dropped to 2.8%. This further supports the manageable inflation outlook for 2019. Nevertheless, upside risks to inflation could still emanate from volatility in global crude oil prices, and the possible impact of the African Swine Fever outbreak. Additionally, an uptick in consumer spending for the remaining months could stem from the holiday spending and the gradual fading of base effects. Overall, while the inflation trend continues to stabilize, the government's catch-up plan is expected to boost spending, lending support to the recovery in GDP growth for the second half. With this, the BSP is expected to pause its interest rate cutting cycle and monitor global and domestic developments first to ensure that the monetary stance remains supportive of price stability and economic growth.

**VIEW STRATEGY**

Fund investment is in banks high yielding deposits maximizing available tenors with best returns. Other alternative investment is short-dated bank LTNCDs with better yields than deposits.
