	LANDBANK		Standard Chartered				

*As a percentage of average daily NAV for the quarter valued at PhP 30,586,212.88

INVESTMENT OBJECTIVE AND STRATEGY

The LANDBANK Medium-Term Bond Fund aims to achieve income growth by investing in a diversified portfolio of Philippine Peso denominated fixed income instruments.

CLIENT SUITABILITY

A *client profiling process* shall be performed prior to participating in the Fund to guide prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The LANDBANK Medium-Term Bond Fund is suitable only for investors who:

- have a Moderate Risk Profile
- are willing to invest in fixed income instruments (such as government securities, corporate bonds, etc.)
- are willing to accept some amount of risk on principal and earnings;
- wishes to have a potential return higher than traditional deposit products; and
- have an investment horizon of 3 to 5 years

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Credit Risk/Default Risk. The possibility for an investor to experience losses due to a borrower’s failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued.

Reinvestment Risk. The risk associated with the possibility of having lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

Interest Rate Risk. This is the possibility for an investor to experience losses due to changes in interest rates.

Market/Price Risk. This is the possibility for an investor to experience losses due to changes in market prices of securities (e.g., bonds and equities).

Liquidity Risk. The possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss.

Inflation Risk. The risk that the value of investment is lower than the rate by which the prices of goods and services go up.

- The Fund implements a risk management policy that applies the principles of Value-at-Risk (VAR) and Modified Duration. VaR is defined as a statistical estimate of the amount of loss that an “open” risk position is unlikely to exceed during a given time period with a given level of confidence. Modified Duration is a means to measure the change in the value of a security in response to a change in interest rates. The formula is used to determine the effect that a 1% change in interest rates will have on the price of the bond.
- The Fund's investment outlets have been subject to proper screening and evaluation in accordance with LANDBANK –TBG’s accreditation process and minimum regulatory requirements.

REDEMPTION CONDITIONS

Surrender of the Confirmation of Participation or submission of a Letter of Instruction and such other reasonable requirements which the TRUSTEE may require; subject to penalty if redeemed before the minimum holding period.

For Partial Redemption, remaining balance should not be less than minimum investment.

DISCLOSURES

- THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC)
- RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENT/FLUCTUATIONS ONLY
- WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT
- THE TRUSTEE IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE
- INVESTORS MUST READ THE COMPLETE DETAILS OF THE FUND IN THE PLAN RULES, MAKE HIS/HER OWN RISK ASSESSMENT, AND WHEN NECESSARY, HE/SHE MUST SEEK INDEPENDENT/PROFESSIONAL OPINION, BEFORE MAKING AN INVESTMENT.

The Fund has deposits with LANDBANK amounting to 1,161,789.64 which is within the limit approved by the Board of Directors. Likewise, all related parties transactions are conducted on an arm's length basis.

FUND MANAGER’S REPORT

The first quarter of 2025 turned out to be a roller-coaster ride as the local bond market got whip-sawed repeatedly from uncertainty stemming from Trump’s tariff agenda. But what threw the markets off-balance was the on-again, off-again, tariff tendencies of Trump. It was virtually impossible to make sensible analyses of market direction except that it’s going to be quite volatile. One sure outcome of the tariffs, however, is higher inflation which prompted the Fed to keep rates steady in its March 19 meeting.

On a macro-level, if the reciprocal tariffs are indeed carried out globally on April 2, 2025, the consequences would be higher global inflation and weaker emerging market currencies, especially for countries with trade deficits like the Philippines. Although our bilateral trade with the U.S. is not really significant, the global the supply chain and our trade activities with other countries/blocs would be adversely affected and inevitably contribute to inflation indirectly. If this goes on for a while, global trade will be seriously impeded and could result in a global economic slowdown or recession."

VIEW STRATEGY

Keep positions short. Observe what happens after the reciprocal tariffs are implemented. If the tariffs kick in, inflation should initially rise globally but there will come a point that economies won’t be able to withstand it anymore. Anticipate this and lock in long positions just before the breaking point. Interest rates would reverse direction once a global economic slowdown/recession takes place.

NAVPU (Year-On-Year)

Highest	2.466256
Lowest	2.320250

STATISTICS

Weighted Ave Tenor	3.75
Monthly Volatility ¹	0.76%
Sharpe Ratio ²	0.03
Information Ratio ³	-0.41

¹Volatility measures the fluctuations in the yield. A higher value means more dispersion from the Fund's average yield. Adjusted. Volatility per month, for the past 1 year.
²Sharpe Ratio evaluates the return-to-risk efficiency of the portfolio. The higher the value, the higher the reward per unit of risk.
³Information Ratio measures reward-to-risk efficiency of the portfolio relative to the benchmark. The higher the number, the higher the reward per unit of risk.

UNIT INVESTMENT TRUST FUND

ABOUT THE LANDBANK MEDIUM-TERM BOND FUND'S BENCHMARK

Weighted average percentage change in the following indices:

- a. Bloomberg Philippine Sovereign Bond Index 1 to 3 Years - 95%
- b. 1-month BVAL price - 5%

However, this should not be construed as a guarantee of yield.

Description of the Benchmark

- a. Bloomberg Philippine Sovereign Bond Index 1 to 3 Years - 95%

Bloomberg's BVAL Evaluated Pricing Service provides transparent and highly defensible prices for fixed-income securities across the liquidity spectrum. The key to BVAL's methodology is its real-time access to market observations from a wealth of contributed sources. This accumulated mass of market data is the main driver of an innovative and quantitative approach that first corroborates market levels on actively traded bonds and then derives a comparable relative value price for those securities that are less liquid.

This methodology aligns with Bloomberg's trusted capabilities as the financial industry's leading analytics platform and source of fixed-income information. In addition to sophisticated algorithms that generate evaluated prices, the BVAL methodology assigns a BVAL Score based on the amount and consistency of market data used in Bloomberg models.

- b. 1-month BVAL

The shortest benchmark tenor. Based on the one-month prevailing market rate that comprises the front-end of the Philippine yield curve.

Key Characteristics

The Bloomberg Philippine Sovereign Bond Index 1 to 3 years (BPHIL13) is a rules-based market-value weighted index engineered to measure the fixed rate local currency securities publicly issued by the Philippines, including retail securities. To be included in the index, a security must have a minimum par amount of PhP3 billion and a credit quality of BBB.

The 1-month BVAL rate is the front-end of the Philippine yield curve which reflects the current yield for a 30-day fixed-income security.

Relation of the benchmark to the fund's objectives/investment strategies

The fund caters to investors with moderate risk profile. It is principally invested in medium-term government and private bonds with a maximum weighted average portfolio life of up to 5 years. Since the 5-year weighted average portfolio life is almost never maximized because of liquidity considerations and the fact that the tenors of securities are reduced every day, it would be most apt to benchmark the fund performance with the BPHIL13 which is a basket of similar securities.

To manage liquidity risk, the fund has to lodge 5% of its net assets in securities with maturity not longer than 30 days. Hence, 5% of the fund is benchmarked on the 1-month BVAL price.
