*As a percentage of average daily NAV for the quarter valued at PhP 32,392,319.85

INVESTMENT OBJECTIVE AND STRATEGY

The LANDBANK Blue Chip Equity Fund seeks to provide long-term capital growth by investing in the blue-chip equities on the Philippine Stock Exchange (PSE).

CLIENT SUITABILITY

A *client profiling process* shall be performed prior to participating in the Fund to guide prospective investors if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The LANDBANK Blue Chip Equity Fund is suitable only for investors who:

- Have an Aggressive risk profile
- are willing to dedicate a small portion of their portfolio, preferably excess funds, for a medium to long term perspective with a high level of return and corresponding risk on an equity portfolio; and
- understands the significance of fluctuating unit prices and that any income/loss arising from market volatilities and price fluctuations is for client’s account.
- Have an investment horizon of 5 to 7 years.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Credit Risk/Default Risk. The risk of losses due to a borrower’s failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued.

Reinvestment Risk. The risk associated with the possibility of having lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

Interest Rate Risk. This is the possibility for an investor to experience losses due to changes in interest rates.

Market/Price Risk. This is the possibility for an investor to experience losses due to changes in market prices of securities.

Liquidity Risk. This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss.

Inflation Risk. The risk that the value of an investment is lower than the rate by which the prices of goods and services go up.

- The Fund implements a risk management policy that applies the principles of Value-at-Risk (VAR) and Modified Duration. VaR is defined as a statistical estimate of the amount of loss that an “open” risk position is unlikely to exceed during a given time period with a given level of confidence. Modified Duration is a means to measure the change in the value of a security in response to a change in interest rates. The formula is used to determine the effect that a 1% change in interest rates will have on the price of the bond.
- The Fund's investment outlets have been subject to proper screening and evaluation in accordance with LANDBANK –TBG’s accreditation process and minimum regulatory requirements.

REDEMPTION CONDITIONS

Surrender of the Confirmation of Participation or submission of a Letter of Instruction and such other reasonable requirements which the TRUSTEE may require; subject to penalty if redeemed before the minimum holding period.

For Partial Redemption, remaining balance should not be less than minimum investment.

DISCLOSURES

- **THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC)**
- **RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENT/FLUCTUATIONS ONLY**
- **WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT**
- **THE TRUSTEE IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE**
- **INVESTORS MUST READ THE COMPLETE DETAILS OF THE FUND IN THE PLAN RULES, MAKE HIS/HER OWN RISK ASSESSMENT, AND WHEN NECESSARY, HE/SHE MUST SEEK INDEPENDENT/PROFESSIONAL OPINION, BEFORE MAKING AN INVESTMENT.**

PORTFOLIO COMPOSITION

RELATED PARTY TRANSACTIONS

The Fund has deposits with LANDBANK amounting to 10,370,720.47 which is within the limit approved by the Board of Directors. Likewise, all related parties transactions are conducted on an arm's length basis.

FUND MANAGER’S REPORT

The Philippine stock market succumbed to the tariff threats of President Trump and slumped to start the year on a negative note falling to as low as the 5,800 level. But at this juncture, valuations are extremely cheap which makes the case for a compelling buy. Forward PE multiple dropped to low double-digit level based on 2025 forecast earnings. This is the cheapest Philippine stocks have been in the last 30 years. In fact, the 11.1x Price to Earnings valuation is cheaper than during the depressed periods brought about by black swan events (i.e. Asian Financial Crisis, Dot-Com Bubble, U.S. Sub-prime Crisis, Covid pandemic.) At current levels, further downside is very limited while potential upside would be huge if Trump’s tariff agenda does not wreak havoc the way it is envisioned to. It is also worth noting that foreign funds have been streaming back into the market in March which could mean that these are positioning in anticipation of a market rebound.

VIEW STRATEGY

Valuation-wise, Philippine stocks are a screaming buy. Many issues have fallen to single-digit PERs and very low Price-to-Book multiples. Nevertheless, it would still be good to select issues with solid fundamentals and good earnings prospects, going forward. Accumulate these badly battered stocks. It is still a trader’s market so sell whenever an 8% return has been realized as a sustained bull run is unlikely given the uncertainties stemming from Trump’s policies.

UNIT INVESTMENT TRUST FUND

ABOUT THE LANDBANK BLUE CHIP EQUITY FUND’S BENCHMARK

Weighted Average Percentage change in the following:

- a. Philippine Stock Exchange Index (PSEi) - 95%
- b. 1-month BVAL prices - 5%

However, this should not be construed as a guarantee of yield.

Description of the Benchmarks

The Philippine Stock Exchange Index (PSEI) is composed of the 30 blue chip listed firms that are most representative of the cross-section of the Philippine economy. These issues should meet the minimum standards as prescribed by Exchange, such as but not limited to, the value of the company, free float level of listed shares, and liquidity in terms of daily trading or value turnover.

The 1-month BVAL rate is the front-end of the Philippine yield curve which reflects the current yield for 30-day fixed-income security.

Key Characteristics

The Philippine Stock Exchange Composite Index (PSEi), is a fixed basket of thirty (30) common stocks of listed companies, carefully selected to represent the general movement of the stock market. In other words, it is the benchmark measuring the performance of the Philippine stock market.

The selection of these companies is based on a specific set of criteria. Under the revised policy on index management, companies should meet three (3) criteria to qualify under the PSEi:

1. The company's free float level must be at least 20%.
2. The company must rank among the top 25% in terms of median daily value in nine out of the twelve-month period in review.
3. Ranking of Top 30 qualified companies based on full market capitalization.

The 1-month BVAL rate reflects the current yield on the 30-day fixed income security.

Relation of the benchmark to the fund’s objectives/investment strategies

The fund is designed for sophisticated investors with high-risk appetite. Invested almost entirely in shares listed in the Philippine Stock Exchange. However, to manage liquidity risk, the fund is mandated to lodge 5% of net assets in 30-day placements. As such, the weighted average of PSEi (95%) and the 1-month BVAL (5%) is the most appropriate benchmark for the fund's performance.
