IPAM Solution with Three (3) Years Support

Description:

The IPAM (IP Address Manager) Solution in tandem with the integrated DNS (Domain Name System), and DHCP (Dynamic Host Configuration Protocol) will provide the bank an added layer of security against rogue devices being plugged into the enterprise network by providing a reliable source of information on devices connected to the network. The IPAM will also prevent malicious DNS lookups to propagate across the network with the use of the solution's DNS sinkhole feature.
