REQUEST FOR INFORMATION

Title of the project	**Core Banking Platform Upgrade - Phase 2**
Date of Posting	01 July 2025
Description	Core Banking Platform Upgrade - Phase 2 is a critical upgrade to our core IT Infrastructure. Phase 2 involves the migration of our Core Banking system (Systematics) and other critical applications to the z/OS operating system. z/OS is a robust, industry-standard platform used by major banks globally and locally, known for handling massive transaction volumes and offering advanced Application Programming Interface (API) capabilities crucial for expanding our digital banking functionalities. The z/OS operating system of the Mainframe infrastructure is analogous to the Windows Operating System running on PCs and laptops.
