

REQUEST FOR INFORMATION

Title of the project	Supply, Delivery, Installation, Testing and Commissioning of Two (2) Precision Air Conditioning Unit (PACU) at Head Office
Date of Posting	08 July 2025
Description	<p>Precision Air Conditioning Unit (PACU) – is a specialized cooling system designed to maintain stringent environmental conditions within data centers. It provides accurate and stable control of temperature and humidity levels, which is critical for the optimal functioning and longevity of sensitive IT equipment such as servers, storage devices, and networking hardware.</p> <p>By maintaining a controlled environment, the Precision Air Conditioning Unit minimizes the risk of hardware failure, reduces downtime, and supports the reliable operation of mission-critical data center infrastructure.</p> <p>Due to the high demand from the Bank’s mission critical systems, both in production and other environments, there is an essential requirement for reliable and resilient infrastructure components, including advanced power backup and precise environmental control systems, to ensure continuous, uninterrupted operations and safeguard critical data and services.</p>
