

## REQUEST FOR INFORMATION

|                             |   |
|-----------------------------|---|
| <b>Title of the project</b> | <b>Supply, Delivery, Installation of 300KVA Uninterruptable Power Supply (UPS) at Head Office</b>   |
| <b>Date of Posting</b>      | 08 July 2025  |
| <b>Description</b>          | <p>300KVA Uninterruptable Power Supply - A 300 kVA Uninterruptible Power Supply (UPS) provides reliable and instantaneous backup power to critical IT infrastructure. It ensures continuous operation during power outages or fluctuations, protects sensitive equipment from damage, and prevents data loss or downtime, thereby maintaining the data center's operational integrity and availability</p> <p>Due to the high demand from the Bank's mission-critical systems, both in production and other environments, there is a need for a robust and reliable power backup solution, such as a 300 kVA Uninterruptible Power Supply (UPS), to ensure continuous operation, prevent data loss, and maintain service availability during power disruptions.</p> |
