Ideal for moderate investors who are willing to take on minimal risks for better returns.

**CLIENT SUITABILITY**

A *client profiling process* should be performed prior to participating in the Fund to guide prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The LANDBANK Global Dollar Fund is classified as a Bond Fund suitable only for investors who:

- Have a Moderate risk profile
- Can accept the risk that the principal investment can be lost in whole or in part when the NAVPU at the time of redemption is lower than the NAVPU at the time of participation.
- With an investment horizon of 3 to 5 years.

**KEY RISKS AND RISK MANAGEMENT**

**You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.**

**Credit Risk/Default Risk.** The risk of losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued.

**Reinvestment Risks.** The risk associated with the possibility of having lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

**Interest Rate Risk.** This is the possibility for an investor to experience losses due to changes in interest rates.

**Market/Price Risk.** This is the possibility for an investor to experience losses due to changes in market prices of securities.

**Inflation Risk.** The risk that the value of investment is lower than the rate by which the prices of goods and services go up.

**Liquidity Risk.** This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss.

- The Fund implements a risk management policy that applies the principles of Value-at-Risk (VAR) and Modified Duration. VaR is defined as a statistical estimate of the amount of loss that an "open" risk position is unlikely to exceed during a given time period with a given level of confidence. Modified Duration is a means to measure the change in the value of a security in response to a change in interest rates. The formula is used to determine the effect that a 1% change in interest rates will have on the price of the bond.
- The Fund's investment outlets have been subject to proper screening and evaluation in accordance with LANDBANK – TBG's accreditation process and minimum regulatory requirements.

**REDEMPTION CONDITIONS**

Surrender of the Confirmation of Participation; subject to penalty if redeemed before the minimum holding period. For Partial Redemption, remaining balance should not be less than minimum investment.

## FUND MANAGER'S REPORT

Another 25bps hike in the federal funds rate brought key rates to 1.50-1.75% as expected of the Federal Reserve with two more in line for the year. The FOMC meeting last March 20, 2018 highlighted a downgrade of economic activity from solid to moderate with labor market remaining strong. Moderate growth with an uptick in inflation sent US Treasury yields up to a high of 2.940% mid-quarter to close March at 2.740% - a rate significantly above 2017's close of 2.430%.

The fourth quarter's latest estimate for US GDP came at 2.9% -more than the 2.7% market survey and previous estimate of 2.5%. The higher than expected record regards consumer spending with the greatest contribution to growth.

The consensus for March CPI is at 2.4%, higher than prior month's 2.2%. Although core CPI is expected to rise 0.2% month-on-month, it is basically unmoved for the last couple of months. Despite market jitters earlier in the quarter due to emerging price pressures, annual CPI is still tame and does not necessarily warrant faster rate hikes for the Fed.

## VIEW STRATEGY

The Fund strategy is to maintain current positions weighted in short-term deposits placement, to protect the Fund from further volatility brought about by rate hike and global market issues.
