LANDBANK					
Miscellaneous Expense per Unit at 0.000976					

**INVESTMENT OBJECTIVE AND STRATEGY**

To generate capital growth while maintaining steady stream of income through a combination of diversified investments in peso-denominated listed equities and tradable fixed income securities. The fund is suitable for investors who are willing to take extra risk in order to avail of the higher investment returns offered by the equities and debt markets.

**CLIENT SUITABILITY**

A *client profiling process* should be performed prior to participating in the Fund to guide prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The LANDBANK Growth Fund is classified as a Balanced Fund suitable only for investors who:

- Have an Aggressive risk profile
- Can accept the risk that the principal investment can be lost in whole or in part
- With an investment horizon of 5 to 7 years.

**KEY RISKS AND RISK MANAGEMENT**

**You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.**

**Credit Risk/Default Risk.** The risk of losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued.

**Reinvestment Risks.** The risk associated with the possibility of having lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

**Interest Rate Risk.** This is the possibility for an investor to experience losses due to changes in interest rates.

**Market/Price Risk.** This is the possibility for an investor to experience losses due to changes in market prices of securities.

**Inflation Risk.** The risk that the value of investment is lower than the rate by which the prices of goods and services go up.

**Liquidity Risk.** This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss.

- The Fund implements a risk management policy that applies the principles of Value-at-Risk (VAR) and Modified Duration. VaR is defined as a statistical estimate of the amount of loss that an "open" risk position is unlikely to exceed during a given time period with a given level of confidence. Modified Duration is a means to measure the change in the value of a security in response to a change in interest rates. The formula is used to determine the effect that a 1% change in interest rates will have on the price of the bond.
- The Fund's investment outlets have been subject to proper screening and evaluation in accordance with LANDBANK – TBG's accreditation process and minimum regulatory requirements.
- To maintain a balance in debt and equity, the Fund will correspondingly invest no more than 60% in equity securities traded in the PSE, including common stocks and preferred stocks of any market capitalization.

**REDEMPTION CONDITIONS**

Surrender of the Confirmation of Participation; subject to penalty if redeemed before the minimum holding period. For Partial Redemption, remaining balance should not be less than minimum investment.

**DISCLOSURES**

- **THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC)**
- **RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENT/FLUCTUATIONS ONLY**
- **WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT**
- **THE TRUSTEE IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE**

**PORTFOLIO COMPOSITION**

**RELATED PARTY TRANSACTIONS**

The Fund has deposits with LANDBANK amounting to P9,458,880.44, which is within the limit approved by the Board of Directors. Likewise, related parties transactions are conducted on an arm's length basis.

**FUND MANAGER'S REPORT**

The country's fourth quarter GDP growth rate was revised higher to 6.3% from 6.1%, bringing the full year average to 6.2%. Still, this missed the government's 6.5 – 6.9% target for 2018, which was already revised lower from the 7-8% target for that year. For 2019, the government maintains the 6-7% forecast citing setbacks from the delayed national budget which could adversely affect government spending. Nevertheless, the domestic demand side is expected to recover as inflationary pressures subside. However, the International Monetary Fund and World Bank has already downgraded 2019 GDP forecasts for the Philippines as general global economic prospects appear less rosy. The current account deficit, meanwhile, was projected by the IMF to narrow from 2.6 percent of gross domestic product in 2018 to 2.2 percent of GDP in 2019. As investors monitor these developments, the local stock barometer struggled to break sustainably past the 8,000 barrier. While it continues to test this level, the index still manages to outperform regional markets on heavy foreign inflows.

**VIEW STRATEGY**

To minimize the volatility due external trade war tensions and foreign selling pressure on the local market, we've had substantially increase our cash position by reducing our exposures on equities, and shorten the portfolio duration. Moving forward, our strategy is to deliberately accumulate underperforming stocks within the index, and cautiously lengthen the fund's portfolio duration by adding fixed income on the medium to long-end of the yield curve for higher yield.

**NAVPU (Year-On-Year)**

Highest	2.407632
Lowest	2.237469

**STATISTICS**

Weighted Ave Tenor	2.35
Monthly Volatility	1.88%
Sharpe Ratio	-0.12
Information Ratio	-0.04

<sup>1</sup>Only for the fixed-income investments portion of the portfolio.  
<sup>2</sup>Volatility measures the fluctuations in the yield. A higher value means more dispersion from the Fund's average yield.  
<sup>3</sup>Sharpe Ratio evaluates the return-to-risk efficiency of the portfolio. The higher the value, the higher the reward per unit of risk.  
<sup>4</sup>Information Ratio measures reward-to-risk efficiency of the portfolio relative to the benchmark. The higher the number, the higher the reward per unit of risk.
